

OPENING OF THE SEVENTH SEAL AND  
EXPECTED ENVIRONMENTAL CATASTROPHE

Once put on the foreheads of the righteous mark with a cross, with the crucifixion of Christ, as I suppose. And now let us follow the events to be implemented.

After opening the Lamb of the seventh seal and a half-hour of silence before

John

magnificent spectacle. He sees seven angels before God, who gave the seven trumpets.

Then came another angel, who laid the golden altar of incense with the prayers of

many saints and all the smoke from the altar of incense with the prayers of the

saints from the hand of the angel before God. And the angel took the censer,

filled it

with fire from the altar and threw it on the ground, where there were voices,

and

thunders, and lightnings and an earthquake. It was a sign that God is displeased

with

people, animals, which are opposed to His will, and violated a specified unit of

the

universe, and the Angels finished pipe.

The first angel sounded, and there followed hail and fire mingled with blood,

and

fell to the ground and the third part of trees was burnt up, and all green grass

was

burnt up (gl.8-7)

Fire \_simvol presence of God and an instrument of His power, He applied for

assistance, and for punishment. It is a basic condition of human civilization

and

seems her death. Indeed, Yahweh, by engaging in personal dialogue with a man is

always a kind of "in the form of fire" on the other hand, the fire is not only a

symbol that expresses the essence of the deity: he or combined with conflicting

symbols as the wind, water, wind, or is transformed into light.

Capitalist attitudes and Globalization processes have resulted in the Earth's atmosphere to irreversible processes, which have resulted in increasing its temperature, thus disrupting the thermal balance of the atmosphere, oceans and glaciers at the poles of the planet. The subsequent rise in temperature in the future lead to increased fires that have already begun a local nature, to the ignition forests and fields on the vast expanses of the earth's surface. And this is all due to the thoughtless human activity - animals.

Krov\_ how God protects life, which he himself gave, so he followed and to ensure that human blood has remained intact. Grad\_ in our sluai and understanding - other than the Bible. Currently, a swarm of microparticles in the Earth's atmosphere with clouds pass over the land, which

- 2 -

formed as a consequence of the storm on the desert. They even painted rain clouds, which then sit down with the raindrops and paint area. Due to the high temperature hail at sufficiently high temperature can not be formed. The reason for painting a rain - red and another color particles, which are in rain water in the form of suspension. Color is often similar to the color of blood. The color of blood early Christians associated with the red and such phenomenon as the wrath of God. At present, these phenomena are very rare on earth but, apparently with a further "development" of civilization due to irreversible processes, the temperature gradually continue to rise imperceptibly. From the evaporation of rainfall on the earth surface temperature will be further enhanced, and burned all the green grass and lots of trees.

Sorry, I got carried away and wrote a few extra details, but I think it will help better understand the processes that will occur in the future.

Witness all of this servant of God John writes, that burned a third of the trees.

Three - one of the most positive numbers in the symbolism of religious thought and mythology.

Jesus Christ was resurrected on the third day after death and then came three times to people. Flat Earth rests on three whales that swim in the ocean. In the legends of the combined power of three characters represents the three-part nature of the world (heaven, earth and water) and the nature and human life: body, soul and spirit, the birth, life and death. Each phenomenon in its development in three stages - creation, deployment, destruction. Finally triad is related to the internal structure of things: for example, the universe has three levels - heaven, earth and underground, in a man is traditionally divided into three constituent elements - spirit, soul and body. Poet servant of our Lord John uses this figure.

8. The second angel sounded, and as a great mountain burning with fire was cast into the sea and the third part of the sea became blood;

9. and died the third part of the creatures living in the sea, and the third part of the ships were destroyed.

It seems that the sky will fall in the sea a large meteorite. But in this case can occur catastrophic changes in surface of the planet, as John does not tell. Can even change the direction of the axis of rotation of the planet followed consequences, which John also tells us nothing. Do not be explained just why the

third part of the sea is painted red color. So it will be an underwater volcano with a large underwater eruption. Underwater Volcano kind of volcanoes. Such volcanoes are located on the bottom of the oceans and seas. Volcanoes of the individual heights of the channels and cracks in the earth's crust on which of the underlying magma chambers are displayed on the surface of the eruptive products - lava. Lava is magma, which is poured out upon the earth's surface during eruptions, and then hardens. In a place with lava erupting gases and dust, which in this case can be painted a thick layer of water above the volcano. If your environment, this will

happen in the water becomes red, it means that the eruption of the volcano lava contained a large number of iron oxide. Molten magma then after cooling turns into stone, tufa red or pink.

- 1.izverzhenie gas and dust
- 2.voda, which is under the influence of gas and dust painted
- 3.zemnaya bark

The figure shows how the eruption in the sea or ocean. Huge waves, mainly related to underwater earthquakes, but sometimes occur during volcanic eruptions on the ocean floor, which may cause a few waves, following an interval of several minutes to several hours. Eruption of Krakatoa August 26, 1883 was accompanied by a tsunami

higher than 30 m, which resulted in numerous casualties on the coasts of Java and Sumatra.

So the ships in the vision of John died because of the fact that they came the tsunami of high power.

10Trety angel sounded, and there fell a great star from heaven, burning like a torch, and it fell upon the third part of the rivers and springs of water.

11 The name of the star is called Wormwood: and the third part of the waters became

wormwood, and many people died from the waters, because they were made bitter.

12 The fourth angel sounded, and was struck, a third of the sun and the third part of the moon and the third part of the stars, so that darkened the third part of them, and the third part of the day would not shine - so, and the night. This is all purely environmental phenomena and probably about that much has been

written by those who tried to decipher the Apocalypse. Air pollution will continue to occur because of increased volcanic activity on the planet. Should increase precipitation in the form of "hail and fire mingled with blood" and so that rain

water falling into the rivers and springs of water will poison them. Increased volcanic processes so will contaminate the atmosphere, lighting the earth's surface by one-third lower. As you can see all these processes are irreversible and environmental disasters destroy people, animals. Creator about all care and free us from these creatures. Yes shines His name.
