

Michaelene's Story of Her Abortion

Abortion appeared to be the only answer. At the clinic I was told the procedure would be quick and safe; allowing me to continue my activities the next day.

I turned to the nurse and told her I didn't think I could go through with it. She held my hand telling me it would be over in a few minutes. Before I could reply, the suction machine was turned on, causing tremendous pain!

I was frightened, and it hurt so much that I wanted to scream, and I just wanted it to stop! I suddenly knew there was a living human life baby inside me, and they were murdering him or her!

Afterwards, limping to the recovery room I felt nauseated, weak, and defeated, and I couldn't stop crying; and neither could the other women that were there, also having Abortions.

My life was irreversibly changed at that moment. I cried for days and weeks...eventually Years! I felt so dirty, so guilty, and unworthy to live. I could have died from the operation and I realized that my future ability to carry a baby full term had been lessened. After that I would often end up sobbing in a corner, very fearful; and I felt like I was going crazy! It all came to a head one evening when I tried to cut my wrists with pieces of a broken plate.

This desperate act scared me into getting help. Through counseling I was able to let go of my fear, guilt, and anger, and accepted the forgiveness that only Jesus can offer after asking Him for forgiveness. Months later I forgave myself and began to mourn the loss of my child, which I knew would take time...and I will always regret my choice to abruptly end my child's life. The choice to have an abortion affected every facet of my life!
