

JESUS CHRIST IN A PARADISE CALLED HEAVEN AND WHAT HE SHOWED ME ABOUT THE BEACHES AND THE CASTLES AND FORESTS, AND WHAT HAPPENED THERE The parables and the values they stand for, God can show many ways to teach them to young readers and adult alike.

This is a story about the kingdom of God—and heaven, as we know its name on here on earth. When Jesus took me to heaven, he showed me all the written parables written in the bible exemplified in visuals and visions, it's kind of like putting on a pair of goggles and seeing what you are reading and living in the word of God and experiencing some of the most iconic and important lessons from the bible. God gave me a way to explore his book through this medium so that I can understand more deeply and confidently what the parables teach, and how we as human being can apply god's principles to our lives and benefit from reaping the intellectual and moral values and truths the bible is keen about upholding and honoring.

The first story god told me was that of a beloved classic, one of my favorite stories, snow white and the seven dwarves. this story starts in the kitchen with a quarter green cup of hard boiled carrots; this represents that the kingdom of god like a mustard seed, small and insignificant at first, and gives food that is a small portion of a carrot, but given time to grow and mature, and proper food and sunlight, fertilizer and plenty of love, can and will turn into a magnificent garden one day, full of all the different seed varieties, bell peppers to large carrots to cucumbers alike, and all in god's plan and will and timing for all of the beautiful seeds to sprout. this will turn into a vegetable basket with god's loveliest lettuce and Swiss chard available. God's garden is a fruitful one, with a lush plentiful harvest with many peas for shelling and corn for shucking. Baby tomatoes picked fresh from the vines from outside and whole milk, with yellow squash a cup of garbanzo beans, a cup of tomato sauce, and cheese. The tomatoes from the vines are plump and healthy and juicy, too! you take one bite, and they pop into your mouth and all the milk, they combine perfectly.

There are many other fruits such as the pea, that can be used in salads and fruit baskets, and green apples are always happy to be used in the salad bowl. this teaches that it's not about how small the carrot cup with steamed carrots is, as starts out every snow white story, in the kitchen before snow white goes to school, it's about what it can grow into and the seeds that were planted started out as a familiar snow white story, but the journey will take us to Jesus and his plan and will for all of his children, but first in this dream, I had experience with sports in the neighborhood, In the streets, there were all of theses tall buildings and I had experience running really quickly from one building to the next, because I was an athlete in this dream and I believe I had athlete shoes and clothes on for running turn to turn, corner to corner, street to street. Down this avenue in this dream, I was apparently a well-known jogger or sportsperson. This dream represents my mind trying to declutter itself and preparing to go on a mental run, or figurative jog, around the neighborhood in my mind, to prepare when God took my spirit up to heaven and gave me the wisdom to stay on the path and God showed me heaven and

this was a warmup jog to get my brain thinking. This is the start of a great spiritual journey that God took me on. and I am happy to be teaching you them in this story.
